About Your Telephone

The 2410 Digital Telephone is a multi-line digital telephone for use with an Avaya call processing system. It is designed to put convenient features and capabilities at your fingertips, including:

- **a large display** — that allows you to view call appearance/feature button labels, the call log, speed dial lists, and call identifier information.
- **a flexible call appearance/feature button display** — that eliminates the need for paper button labels.
- **a customizable interface** — that allows you to create personal speed dial lists, to specify the call types you want to appear in the call log, to select the telephone ring pattern, to customize the call appearance/feature button labels, and to choose the language displayed on your telephone.
- **Note:** You can choose to view screen text in English, German, French, Spanish, Italian, Dutch, Portuguese, or Japanese.
- **a programmable speed dial list** — that allows you to store up to 48 entries.
- **a programmable call log** — that supports up to 48 entries (including calling party name and number, when available, for incoming calls) and allows you to specify the call types (that is, answered or unanswered incoming calls, and outgoing calls) that are logged.
- **customizable call appearance/feature button labels** — that allow you to change the labels for the call appearance/feature buttons programmed on your call processing system. Up to 13 characters can be displayed for each label.
- **compatibility with a variety of headsets** — works with one headset directly connected to the telephone via an amplifier adapter (HIC-1) cord.
- **support for the Group Listen feature** — when this feature is programmed, you can use the handset (or headset) and speaker of the telephone simultaneously. While you’re talking with the other party via the handset (or headset), another person can use the speaker to listen to the conversation.

As soon as you install the telephone, you can take advantage of these powerful features because your telephone is instantly recognized by your call processing system. Depending on how it is administered at the call processing system, the telephone can also be moved to another office at your location and begin working without interruption. There’s no need to wait for reprogramming or technical support.
1) Call appearance/feature buttons — For accessing incoming/outgoing lines and programmed features. An underscore indicates the currently selected call appearance.

2) Display — This area shows status for the call appearances, information for a call, information provided by the Avaya call server, and the Home, Speed Dial, Call Log, and Options screens.

3) Message lamp — This lamp is lit when a message has arrived in your voice mailbox. When you set this lamp to Visual Ring, it flashes to alert you to incoming calls. You can retrieve messages using .

4) Softkeys — These keys allow you to perform specific functions. The functions available and the corresponding softkey labels change according to the screen displayed. To initially view softkey labels, press any softkey.

5) Message button — For retrieving messages.

6) Arrow keys — Depending on the current screen display, you can use these keys to move between screen pages, to cycle through Call Log and Speed Dial entries, and to move the cursor during data entry.

7) Call handling buttons — For call handling activities.

8) Dialpad — Standard 12-button pad for dialing telephone numbers.

9) Volume control buttons — For adjusting speaker, handset, headset, or ringer volume depending on which component is in use.

10) Mute button — For turning off the microphone (handset, headset, or speaker). When the Mute feature is active, the associated light turns on and the person at the other end of the call cannot hear you.

11) Headset button — For activating a headset connected to the 2410 headset jack. The light associated with this button turns on when the headset is active.

12) Speaker button — For accessing the built-in two-way speakerphone. The light associated with this button turns on when the speakerphone is active.

13) Exit button — Pressing this button returns you to the first page of the Home screen.
The Home Screen

The Home screen, which consists of two pages, displays the available call appearance/feature buttons, caller ID information, the current date and time, softkeys, and information provided by the Avaya call processing system. In general, you use the Home screen to perform standard call handling. Six call appearance/feature buttons are displayed on each page of the Home screen (as shown in Figure 2).

The date and time information is provided by your call processing system. This information is displayed below the call appearance/feature button area when the telephone is idle.

**Note:** After initially plugging in your telephone or after a power outage, it may take several minutes before the time and date appear on the screen. If the date and time displayed are incorrect, contact your system manager.

If you program your telephone to log unanswered, incoming calls, the counter displaying this number of new calls appears below the date and time. Every time you access the Call Log Summary screen to view the information in the call log, the counter is reset to 0.

To view the softkey labels, press any one of the softkeys. You must press one of the softkeys to access the softkey features (that is, Speed Dial, Call Log, Options, and Labels.)

Call Appearance and Call Identification Displays
Your telephone has six call appearance/feature buttons per screen page. Beginning with the first button in the upper left corner of the telephone and going down, the display identifies the buttons in the left column. These buttons are considered call appearance/feature buttons 1 through 3. On the display, these buttons are identified by default labels a, b, c, etc., where a represents call appearance/feature button 1. The buttons in the right column run from 4 through 6.

When you receive or make calls, the available call identification information is displayed where the date and time appear when the telephone is idle. For example, when you dial an extension, that number is shown and then replaced by the called party’s name and extension. The call identification information associated with an extension is provided by the call processing system. When a call is received from another extension, the caller’s name is shown; when a call is received from outside, the calling number (if available), "OUTSIDE CALL," or a trunk identifier is shown.

One call appearance is usually underlined. When a call arrives at the telephone, the bell icon blinks on the corresponding call appearance. After you answer the call, the active call icon is displayed.

**Note:** If the call appearance is not displayed on the current Home screen page, use or to locate and answer the appropriate call appearance.

The display remains in call handling mode until you activate one of the other softkey features. (When you press one of the softkeys, the softkey labels are displayed.) After using any of these features, return to Page 1 of the Home Screen by pressing .

Status Icons
The icons displayed on the call appearance/feature buttons of your telephone are explained in the following table. These icons replace the functionality of the green LEDs and equivalent flash rates.

<table>

**Conventions**

**Conventions Used in the Procedure Descriptions**

LWC CnLWC AutCB Timer

Information that is offset represents the display screen. The second line appearing on the display will most likely list the features you can access with the softkeys.

{handset tones}

The tone that appears in curly quotes after a step, such as {dial tone}, indicates what you should hear from your handset (or speakerphone) after successfully performing that step.

**Special Instructions**

Use the following special instructions for operating your telephone.

- To operate a feature, you must have the handset off-hook (removed from the cradle of the telephone) or the speaker or speakerphone on unless otherwise noted.
- If you receive an **intercept tone** (high-pitched, alternating high and low tone) while attempting to operate any feature, you have taken too much time to complete a procedural step or have made a dialing error. Hang up, get dial tone, and return to Step 1.
Feature Finder

Hold
Puts a call on hold until you can return to it.

Transfer
The Transfer feature lets you transfer a call from your telephone to another extension or outside number.

Call Park
Allows you to put a call on hold at your telephone, for retrieval at any extension.

Call Pickup
Lets you answer a call at your telephone for another extension in your pickup group. Use when you wish to handle a call for a group member who is absent or otherwise unable to answer.
Note: You can use this feature only if you and the called party have been assigned to the same pickup group by your system manager.

Conference
Allows you to conference up to six parties on a call (including yourself) so that you can conduct a 6-way discussion. Use to set up timesaving conferences, or to spontaneously include an additional party important to a conversation.

Call Forwarding All Calls
The Call Forwarding feature temporarily forwards all your calls to another extension or to an outside number, depending on your system.

Send All Calls
Temporarily sends all your calls to your voice mail system or to another extension in the same system. Note that priority calls and automatic callbacks are not redirected by the Send All Calls feature.
Note: Before you can use this feature, your system manager must provide a coverage path for your extension.

Directory
Allows you to search for the extension of another user in your call processing system directory by keying in the user's name at the dial pad.

Call Log
The Call Log application stores up to 48 entries. Use this application to call a person directly from the Call Log display or to add a log entry's name and phone number to a speed dial button.

Priority Calling
Allows you to call an extension with a distinctive 3-burst ring to indicate your call requires immediate attention. Use when you have important or timely information for someone.

Message
Your Message lamp turns on when a caller has left a message for you.

Speakerphone
The two-way built-in speakerphone allows you to make and answer calls without lifting your handset. Keep in mind that two-way speakerphones may not operate satisfactorily in every environment (such as in very noisy locations).

Speed Dial
Allows you to have the telephone automatically dial calls to telephone numbers stored in your personal directory.

Redial
Automatically redials the last number that you dialed. Use to save time in redialing a busy or unanswered number.
Hold

To put a call on hold:

1. Press \[Hold\].

To return to the held call:

1. Press the call appearance button of the held call.

Note: Your system manager may have administered the Unhold feature. In this case, you can return to the held call by pressing \[Hold\].

Transfer

To transfer the current call to another extension:

1. While on a call, press \[Transfer\].
2. When you hear dial tone, dial the number to which the call is to be transferred.
3. To transfer the call without announcing it, press \[Transfer\] again, and hang up. The transfer is complete.

    To announce the call before transferring it, wait for the called party to answer. Go to Step 4.
4. When the called party answers, announce the call. (If the line is busy or if there is no answer, press \[Hang\]. Then, you can return to the held call by pressing its call appearance button.)
5. Press \[Transfer\] again and hang up to complete the transfer.

    \[Call Park\]

    \[Hold\]

    \[Transfer\]

    \[Hang\]

Note: Your system manager may have administered the Transfer-on-Hang-up feature. In this case, you can transfer a call by pressing \[Transfer\], dialing the number to which the call is to be transferred, and then hanging up. To cancel an attempted transfer, press the original call appearance. If your system has auto-hold activated, use \[Hold\] to cancel a transfer so that the potential transfer recipient is not left on hold.

Call Park

To park a call for retrieval from any extension:

Note: If Call Park has been assigned to your telephone, simply press Call Park then press Release; otherwise, follow the instructions below.

1. Press Transfer.
   \{dial tone\}

2. Dial the Call Park code *6.
   \{confirmation tone\}

3. Press Transfer again.
   \o The call is parked.

4. Hang up.

To park a call at your extension (for retrieval at any extension) when a Call Park button is not administered:

1. Press \[Transfer\].
2. Enter the Call Park code *6.
3. When you hear confirmation tone, hang up.

To retrieve a parked call from another extension:

1. Pick up the handset or press \[Hold\].
2. Dial the Answer Back code #6.
3. When you hear a dial tone, dial the extension at which you parked the call.
4. If returning to a call parked at your telephone, dial your own extension.
To return to a call parked at your extension:
   1. Press **Call Park**.
      or, Dial the Answer Back code **#6** and then your extension number.
         o You are connected to the call.

---

**Call Pickup**

To answer a call placed to your pickup group when your phone is idle:
*Note:* You can only use this feature if you and the called party have been assigned to the same pickup group by your system manager.
   1. Press **Call Pickup**.
      or, Dial the Call Pickup code ***7**.
         o You are connected to the ringing call.

---

To answer a new call while active on another:
   1. Press **Hold**.
      o The present call is put on hold.
      o The held call icon is displayed.
   2. Press **Call Pickup**.
      o The called telephone stops ringing.
      o You are connected to the incoming call.
   *Note:* To return to the call on hold after completing call pickup, press the fluttering call appearance button.

---

**Conference**

To add another party to a call:
   1. Press **ccc**.
   2. When you hear dial tone, dial the number of the person you want to add to the call.
   3. Wait for an answer.
   4. To add the person to the call, press **ccc** again. (If the called party does not answer or does not want to join the conference, press **ccc**. Then, you can return to the held call by pressing its call appearance button.
   5. Repeat Steps 1 through 4 for additional conference connections.

To add a held call to an active call:
   1. Press **ccc**.
   2. When you hear dial tone, press the call appearance button corresponding to the held call.
   3. Press **ccc** again.

To remove the last person added to the conference call:
   1. Make sure that the conferenced call appearance is selected.
   2. Press **ccc**.

---

**Call Forwarding All Calls**

To temporarily redirect all calls:
*Note:* Calls to an EAS agent login-ID extension cannot be forwarded. Also with EAS, if calls need to be forwarded for the station you are logged into, forwarding must be done before you actually log in.
   1. Press **Call Forward**.
      or, Dial the Call Forward code ***2**.
        {dial tone}
   *Note:* If you have console permission and are not forwarding your own calls, dial the extension number whose calls are to be forwarded. You will receive dial tone.
   2. Dial the extension or phone number where calls are to be sent.
        {confirmation tone}
3. Hang up.
   \textbf{Note:} You may hear a ring-ping tone from your telephone as each call is forwarded.

### To cancel Call Forwarding:
1. Press the \textbf{Call Fwd} button again (while on-hook).
   or, Dial the Call Forward Cancel code \#2 (while off-hook).

---

## Send All Calls

### To send all calls (except priority calls) and automatic callbacks immediately to coverage:
1. Press the \textbf{Send Calls} button (while on-hook).
   or, Dial the Send All Calls code *3 (while off-hook)
   \begin{itemize}
   \item Listen for confirmation tone.
   \end{itemize}
   \textbf{Note:} You hear confirmation tone only when you use a feature access code.

### To cancel Send All Calls:
1. Press the \textbf{Send Calls} button again (while on-hook).
   or, Dial the Send All Calls Cancel code \#3 (while off-hook).
2. Listen for confirmation tone.

---

## Directory

### To search the directory for a name:
1. Press the \textbf{Directory} button (if administered).
2. Key in the selected name with dial pad keys: \textit{last name, comma} (use \textasteriskcentered), \textit{first name or initial}.
3. Press the \textbf{Next} button for each successive directory name you wish to see. (The \textbf{Next} button must be administered by your system manager.)
4. To search for a new name, press the \textbf{Directory} button and go through the above sequence again.
5. When you are ready to exit the directory, press \textasteriskcentered.

### To place a call to the name shown on the display:
1. Pick up the handset.
2. While the name is shown, press the \textbf{Call Disp} button (if administered) or, if you do not have a \textbf{Call Disp} button on your set, press \textasteriskcentered and then dial the number using the dial pad.
   \textbf{Note:} You can also leave your handset on-hook. The speakerphone will turn on automatically when you press \textbf{Call Disp} if this system feature is enabled.

---

## Call Log

### The Call Log Screens

Your telephone can store up to 48 entries in the Call Log. By default, all types of calls are logged, and the number of new unanswered calls is displayed below the date and time on your telephone.

\textbf{Note:} When power to the telephone is interrupted, all entries in the Call Log are erased.

You can disable the Call Log or specify certain call types you want logged using the Log Setup option on the Options screen.

Two screens allow you to view Call Log information:
- The Call Log Summary screen
- The Call Detail screen

---

### The Call Log Summary Screen

The Call Log Summary screen, which is accessed by pressing the \textbf{Log} softkey on the Home screen, displays the following call identification information:
- For incoming calls—calling party name and telephone number (if this information is available from the call processing system). Note that the caller's name may be abbreviated if it is longer than 16 characters.
• For outgoing calls—the telephone number (that is, the digits that you entered on the telephone dialpad). If you used the speed dial list to make a call, speed dial entry name and number are displayed in the log.

  **Note:** Outgoing calls made using the or other abbreviated dialing buttons cannot be logged.

Each page of the Call Log Summary screen can display three entries. You can use and to page through all logged calls.

The most recent call is displayed in the top-most position of the first page. When the log is full (that is, 48 calls), the log automatically deletes the oldest call information to allow for continuous logging without interruption. In addition, you can delete specific entries from the Call Log Detail screen.

  **Note:** Every time you access the Call Log Summary screen to view the information in the call log, the counter displaying new calls is reset to 0.

To view more information (such as the date and time) for a specific entry in the log summary, press the button associated with the entry to access the Call Log Detail screen.

### Call Log Detail Screen

The Call Log Detail screen, which is accessed from the Call Log Summary screen, allows you to:

• View additional information, such as call type and the date and time that the call was processed.
Make a call to the entry displayed directly from this screen. A sample Call Log Detail screen is shown below.

The number displayed in the upper left corner of the screen indicates the position of this call in the log summary. The call type (that is, Answered, Unanswered, or Outgoing) is displayed in the upper right corner.

Working in the Call Log Detail Screen

**To**

- Make a call to the entry displayed
- View the next call log entry
- View the previous call log entry
- Use the index feature to locate a specific entry quickly

**Press**

- The Call softkey
- Press 1 to view the tenth call log entry.
- Press 2 to view the twentieth call log entry.
- Press 3 to view the thirtieth call log entry.
- Press 4 to view the fortieth call log entry.
- Press 5 to view the last call log entry.
- The Delete softkey
- The Save softkey
- The Done softkey
- Return to Page 1 of the Home screen at any time

To view the list of all calls recorded in the Call Log:

1. If the softkey labels are not displayed, press any softkey button to display the softkey labels.
2. From the Home screen, press the Log softkey.
   - The Call Log Summary screen is displayed.
3. Use and to scroll through the Call Log Summary pages.
4. To view information about a specific entry, press the button corresponding to the entry.
   - The Call Log Detail screen for this entry is displayed.
5. Press to return to the Home screen.
To make a call to an entry in the Call Log:
1. From the Home screen, press the Log softkey.
   - The Call Log Summary screen is displayed.
2. Use < and > to scroll through the Call Log Summary pages.
3. When you locate an entry you want to call, press the button corresponding to the entry.
   - The Call Log Detail screen for this entry is displayed.
4. Press the Call softkey to make the call.

Note: You can make calls directly to extensions using this method. To call outside numbers, go off-hook and dial the necessary code (for example, “9” for a local or seven-digit call or “9” and “1” for a 10-digit call). Then, press the Call softkey to make the call.

To save an entry in the Call Log to your Speed Dial List:
1. From the Home screen, press the Log softkey.
   - The Call Log Summary screen is displayed.
2. Use < and > to scroll through the Call Log Summary pages.
3. When you locate an entry you want to save, press the button corresponding to the entry.
   - The Call Log Detail screen for this entry is displayed.
4. Press the Save softkey.
   - The Edit Name screen is displayed showing the name and number information from the Call Log.
5. Do one of the following:
   - To save the entry to your Speed Dial List as shown on the current screen, press the Save softkey.
   - To edit the telephone number to include a code required to access an outside line (for example, “9”), press the feature button to the left of the Number field twice. (The cursor appears at the beginning of the telephone number.) Press the feature button to the right of Insert Mode so that you can enter characters at the beginning of the number, and then make your changes. When you are done entering changes, press the Save softkey.
   - The entry is saved to your Speed Dial List.

Note: If you see the message “Speed Dial List Full,” you must delete some Speed Dial List entries before you can add new entries.

To delete an entry from the Call Log:
1. From the Home screen, press the Log softkey.
   - The Call Log Summary screen is displayed.
2. Use < and > to scroll through the Call Log Summary pages.
3. When you locate an entry you want to delete, press the button corresponding to the entry.
   - The Call Log Detail screen for this entry is displayed.
4. Press the Delete softkey.
   - The entry is deleted from the Call Log.

Priority Calling

To place a priority call:
1. Press Priority.
   - or, Dial the Priority Calling code *1.
   {dial tone}
2. Dial the extension.

Note: If your call is not answered and you wish to redirect it to coverage, press Go to Cover while the call is ringing.

To change a regular call into a priority call:
1. Press Priority.
2. Wait for the called party to answer.

Note: If you still receive a call waiting ringback tone, wait a few minutes and try again.
Message

To retrieve a message:

1. Press ✉️ to retrieve your messages, and follow the prompts.

Note: Certain features must be programmed by your system manager to activate the Message button. Please see your system manager if the Message button is not working properly.

Speakerphone

To make or answer a call without lifting the handset, or to use the speakerphone with any feature:

1. Press ☽.
2. Make or answer the call, or access the selected feature.
3. Adjust speakerphone volume if necessary.

Note: If you want to make the speakerphone volume louder, you can disable the speakerphone AGC by setting “Speaker AGC Enabled” to “No” in the second page of the Options screen. When enabled, speakerphone AGC automatically adjusts volume levels by increasing low signals and decreasing high signals. If you disable the speakerphone AGC, low volume levels will not be increased automatically.

To use the Group Listen feature (if administered) in which the handset (or headset) and the speaker are active at the same time:

1. While you are active on the handset (or headset), press ☽.

To change from the headset to the speakerphone:

1. Press ☽.

To change from the handset to the speakerphone:

1. Press ☽.
2. Hang up the handset.

To change from the speaker to the handset:

1. Pick up the handset and talk.

To end a speakerphone call:

1. Press ☽ again.

Speed Dial

Using the Speed Dial Screen

Using the Speed Dial screen, you can store up to 48 speed dial entries in the personal directory of your telephone. You can access this screen by pressing the SpDial softkey at the Home screen. (You may have to press any one of the softkeys to display the softkey labels.)

Note: The personal directory containing your speed dial entries of numbers you call frequently is stored in your telephone. The personal directory is separate from the Directory feature, which resides on the call processing system. The Directory feature, which is administered by your system manager, allows any call processing system user to search for the extension of another user in the call processing system directory.

When you have created a speed dial list, the Speed Dial screen displays the saved entries in alphabetical order. A single page displays six entries. You can make a call directly from this screen by pressing the button associated with a displayed entry.

The figure below shows a sample Speed Dial screen.
In addition to placing calls from the Speed Dial screen, you can add entries, delete entries, and make changes to saved entries in your personal speed dial list using the softkeys displayed at the bottom of the screen.

**Note:** After you access specific screens to manage your speed dial entries, the softkeys displayed at the bottom of the screen change to reflect the activities that you can perform. For example, when you access the Edit screen, you can choose from the Add, Delete, and Done keys. The **Edit** and **Delete** softkeys are not displayed, though, until you have saved at least one entry in your personal speed dial list.

**Note:** Keep in mind that whenever you are working in the Speed Dial screens (adding, editing, and deleting speed dial entries), you cannot use the telephone dialpad for dialing.
Managing Your Speed Dial List

Using the Speed Dial screen, you can store up to 48 speed dial entries in your personal telephone directory. You can access this screen by pressing the SpDial softkey at the Home screen.

When you have created a speed dial list, the Speed Dial screen displays the saved entries in alphabetical order. A single page displays six entries.

You can add entries, delete entries, and make changes to saved entries in your personal speed dial list using the softkeys displayed at the bottom of the screen. You can also save Call Log entries to your Speed Dial List.

Quick Access to Speed Dial Entries

When you access your speed dial list to select, edit, or delete entries, you can use the index feature to locate a specific entry quickly. For example, press 1 on the dialpad to move directly to the beginning of the list.

You can use keys 2 through 9 on the dialpad to locate entries beginning with the letters that correspond to these keys. For example, press 3 to locate the first entry that begins with the letter “D.” If no entries begin with the letter “D,” then the first entry that begins with the letter “E” is selected.

Insert Mode

After you select a speed dial entry for editing, you can use the Insert Mode while you are working in the Edit screen. When Insert Mode is enabled (as indicated by to the right of Insert Mode in the lower right corner of the screen display), use to move the cursor to the left without erasing characters. For example, you can press to insert an area code in front of an existing telephone number in a saved entry.

To turn Insert Mode on and off, press its associated button on the Edit Name/Number screen. Note that when you first access the Edit Name screen, Insert Mode is “off.”

Entering Characters

Keep in mind that each time you press a key on the dialpad, the alphabetic character associated with the key is shown on the screen display. In some cases, you may need to press the same key repeatedly to select other alphabetic characters. For example, to enter “Jack:”

- Press 5 for “J.” This first letter is automatically entered as an uppercase letter. All of the following characters in the word appear in lowercase.
- Press 2 for “a.” Then, press to advance the cursor.
- Press 2 three consecutive times for “c.”
- Press 5 twice for “k.”

Note that you must use if the next character you want to enter uses the same key as the character you just entered (for example, the characters “a” and “c” are both entered using the 2 key).

Dialing Conventions

It is important that you observe the following conventions as you enter speed dial numbers:

- You can enter telephone numbers up to 20 characters long, including special characters and spaces.
- You must include the code required to access an outside line (for example, “9”) for external telephone numbers.
- You can use the Pause softkey to insert a 1.5-second pause. It is often useful to include a pause (or series of pauses) in beeper/pager numbers to allow a paging system enough time to answer.
- You can use the Hyphen softkey to insert hyphens between segments of a telephone number (for example, “9-732-555-1212”). The hyphen may make the number easier for you to read but does not affect dialing.

Note: You can store up to 48 personal speed dial entries in the telephone. When the maximum number of entries is stored, you must delete existing entries before the telephone allows you to enter new ones.

To add speed dial entries to your personal directory:

1. From the Home screen, press the SpDial softkey.
The Speed Dial screen is displayed (or, if no Speed Dial List already exists, the Empty Speed Dial List screen is displayed).

2. Press the Add softkey.
   - The Edit Name screen is displayed with the Name field underscored.
   **Note:** If the directory is full, a message is displayed indicating that your Speed Dial list is full. You must delete an existing entry before a new entry can be added.

3. Using the dialpad, enter the name for your speed dial entry. You can enter up to 13 characters. By default, the first letter you enter appears in uppercase, and the following characters in the word appear in lowercase.
   **Note:** You can use the Case softkey to switch between uppercase and lowercase. You can use the Space softkey to insert a space between words. After you enter a space, the next character will be an uppercase letter, and the following characters in that word will appear in lowercase. If you are entering special characters, you can use the * (star key) to cycle through the period and star characters. You can use the # (pound key) to cycle through the hyphen and pound characters.

4. When you are done entering a name, press the feature button to the left of the Number field (Edit Number screen) to advance to that field.

5. Using the dialpad, enter the telephone number for this speed dial entry. You can enter numbers up to 20 characters long, including special characters.

6. When you are done entering the telephone number, do one of the following:
   - To save your entries and return to the Speed Dial screen, press the Save softkey.
   - To continue without saving your entries, press the Cancel softkey.
   - To return to Page 1 of the Home screen without saving your entries, press .

7. Repeat Steps 2 through 6 to add more entries.

**To make a call to a personal directory entry using the Speed Dial feature:**

1. If the softkey labels are not displayed, press any softkey button to display the softkey labels.

2. From the Home screen, press the SpDial softkey.
   - The Speed Dial screen is displayed.

3. Press the button next to the entry you want to call. (If the entry you want is not displayed on the current page, use and to cycle through the entries.)
   - The telephone dials the number for you.

**To edit stored speed dial entries:**

1. From the Home screen, press the SpDial softkey.
   - The Speed Dial screen is displayed.

2. Press the Edit softkey.
   - The Edit Name screen is displayed.
   **Note:** You can use or the index feature to locate the entry you want to edit.

3. Press the feature button corresponding to the entry you want to edit.
   - The Edit screen is displayed with the Name field underscored.

4. Using the dialpad, edit the name for your speed dial entry. You can enter up to 13 characters. By default, the first letter you enter appears in uppercase, and the following characters appear in lowercase.
   **Note:** You can use the Case softkey to switch between uppercase and lowercase. You can use the Space softkey to insert a space between words. If you are entering special characters, you can use the * (star key) to cycle through the period and star characters. You can use the # (pound key) to cycle through the hyphen and pound characters.

5. When you are done editing the name, press the feature button to the left of the Number field (Edit Number screen) to advance to that field. Otherwise, go to Step 7.

6. Using the dialpad, edit the telephone number for this speed dial entry. You can enter numbers up to 20 characters long, including special characters.
   **Note:** You can use the feature button to the right of the Number field to go directly to the end of any existing text in that field. The feature button to the left of the Number field takes you directly to the start of any existing text in that field. The feature button at the top of the left column returns you to the Edit Name screen.

7. When you are done making changes, do one of the following:
   - To save your entries and return to the Edit screen, press the Save softkey.
   - To return to the Edit screen without saving your entries, press the Cancel softkey.
   - To return to Page 1 of the Home screen without saving your entries, press .
8. Repeat Steps 3 through 7 to edit more entries.

To delete stored speed dial entries:
1. From the Home screen, press the **SpDial** softkey.
   - The Speed Dial screen is displayed.
2. Press the **Delete** softkey.
   - The Delete screen is displayed.
3. Press the feature button corresponding to the entry you want to delete.
   - **Note:** If the entry you want to delete is not displayed on the current screen page, use and to cycle through the speed dial list. You can also use the index feature to move to the page containing the entry.
4. Do one of the following:
   - To delete the selected entry, press the **Yes** softkey.
   - To return to the Delete screen without deleting the entry, press the **Cancel** softkey.
   - To return to Page 1 of the Home screen without deleting the entry, press .
5. Repeat Steps 3 through 4 to delete more entries.

Redial

To redial the last number that you dialed:
1. Press .

Tones and Their Meanings

**Note:** The tables below describe the defaults for each ringing and feedback tone. Check with your system manager to verify if the descriptions in the **Meaning** column are accurate for your system.

**Ringing Tones** are produced by an incoming call.

<table>
<thead>
<tr>
<th>Rings</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 ring</td>
<td>A call from another extension.</td>
</tr>
<tr>
<td>2 rings</td>
<td>A call from outside or from the attendant.</td>
</tr>
<tr>
<td>3 rings</td>
<td>A priority call from another extension, or from an Automatic Callback call you placed.</td>
</tr>
<tr>
<td>ring-ping (half-ring)</td>
<td>A call redirected from your telephone to another because Send All Calls or Call Forwarding All Calls is active.</td>
</tr>
</tbody>
</table>

**Feedback tones** are those which you hear through the handset, headset, or the speaker.

<table>

<tbody>
<tr>
<td>busy</td>
<td>A low-pitched tone repeated 60 times a minute; indicates the number dialed is in use.</td>
</tr>
<tr>
<td>call waiting ringback</td>
<td>A ringback tone with lower-pitched signal at the end; indicates the extension call is busy, and the called party has been given a call waiting tone. If you hear this tone, you may wish to activate Automatic Callback.</td>
</tr>
<tr>
<td>confirmation</td>
<td>Three short bursts of tone; indicates a feature activation or</td>
</tr>
</tbody>
</table>
cancellation has been accepted.

coverage
One short burst of tone; indicates your call will be sent to another extension to be answered by a covering user.

dial
A continuous tone; indicates dialing can begin.

intercept/ time-out
An alternating high and low tone; indicates a dialing error, a denial of the service requested, or a failure to dial within a preset interval (usually 10 seconds) after lifting the handset or dialing the previous digit.

recall dial
Three short bursts of tone followed by a steady dial tone; indicates the feature request has been accepted and dialing can begin.

reorder
A fast busy tone repeated 120 times a minute; indicates all trunks are busy.

ringback
A low-pitched tone repeated 15 times a minute; indicates the number dialed is being rung.

Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| A feature does not work as noted in the book. | 1. Reread the procedure and try again.  
2. For many features you must lift the handset before you can use the feature.  
3. Check with your system manager to be sure this feature is administered on your telephone. |
| There is no dial tone. | 1. Check with your system manager to be sure your telephone is administered correctly.  
2. Make sure the handset and line cords at your telephone are securely connected at both ends.  
3. Find a working telephone of the same type as your own. Unplug this telephone from its modular wall jack. Plug your telephone into that jack and check if it gets dial tone.  
4. If your telephone still does not work, plug the working telephone (of the same type) into your modular wall jack. If the working telephone has dial tone, your own telephone is faulty. See your system manager. |
| The telephone does not ring. | 1. Set the ringer volume to a higher level.  
2. Place a test call from another extension to your extension.  
3. Check the line cord to make certain that it is securely connected at both ends.  
4. If there is still a problem, see your system manager. |
| The lights do not go on next to the buttons. | 1. Check the line cord to make certain that it is securely connected at both ends.  
2. If there is still a problem, see your system manager. |
Glossary

activate
To begin or turn on the operation of a feature.

attendant
The person who handles incoming and outgoing calls at the main console.

AUDIX
Audio Information Exchange, an optional voice mail and message service that provides coverage for calls to you by recording callers' messages and reporting Leave Word Calling messages.

call appearance button
A button used exclusively to place, receive, or hold calls. It has an assigned extension number.

console permission
The authorization (from your system manager) to initiate Call Forwarding All Calls for an extension other than your own.

coverage
Automatic redirection of calls from an unanswered phone to another phone. Redirection could be to the extension of a receptionist, secretary, co-worker, AUDIX, or message center. A person who provides coverage is a covering user.

dial pad
The 12 pushbuttons that you use to dial a number and access features.

enhanced list
One of the four types of Abbreviated Dialing lists; programmable only by the system manager. Contains phone numbers useful to all system members, and stores each of those numbers as a 1-, 2-, or 3-digit list item.

extension
A dialing number of 1 to 5 digits assigned to each phone connected to your Avaya switch.

feature
A special function or service, such as Conference, Hold, Send All Calls, etc.

feature code
A dial code of 1, 2, or 3 digits that you use to activate or cancel the operation of a feature.

group list
One of the four types of Abbreviated Dialing lists; programmable only by the system manager. Contains phone numbers useful to members of a specific group, and stores each of those numbers as a 2-digit list item.

handset
The handheld part of the telephone that you pick up, talk into, and listen from. This is sometimes called the "receiver".

message retriever
A person authorized by the system manager to retrieve messages for other users.

off-hook
When the headset is activated, the handset is removed from the cradle (for example, when you lift the handset to place or answer a call), or speaker is on.

on-hook
When the headset is not activated, the handset is left on the cradle, and the speaker is off.

party
A person who places or answers a call.

personal list
One of the four types of Abbreviated Dialing lists; programmable by the system manager or by you, the user. Contains phone numbers of your choice, and stores each of them as a single-digit list item.
**personal list item**
One of the 10 available slots on an Abbreviated Dialing personal list. The first nine personal list items are given digits 1 to 9, with 0 for the tenth item.

**pickup group**
A group of telephone users who can answer calls for each other through the Call Pickup feature. Group members are determined by the system manager and are usually located in the same work area or perform similar job functions.

**priority call**
An important or urgent call that sends a special 3-burst ring.

**program/reprogram**
To use your dial pad to assign a phone number to a personal list item or an AD xxxx button for Abbreviated Dialing.

**retrieve**
To collect phone messages with the Message or Voice Message Retrieval features. (Also, with Call Park, to resume a call from an extension other than the one where the call was first placed or received.)

**ringer**
The device that produces the electronic ringing sound in your telephone.

**stored number**
A phone number that has been programmed and stored as a 1-, 2-, or 3-digit list item for use with Abbreviated Dialing. It can be a complete or partial phone number, an extension number, or a trunk or feature code. Once programmed, a number can be accessed by first dialing the list, then the list item digit(s) under which it is stored; if the number is stored on an AD xxxx button, the number can be accessed by simply pressing that button.

**switch**
The device that makes connections for all voice and data calls for a network, and also contains software for features. Also known as a system, switching system, or ECS (Enterprise Communications Server).

**system list**
one of the four types of Abbreviated Dialing lists; programmable only by the system manager. Contains phone numbers helpful to all system users, and stores each of those numbers as a 2-digit list item.

**system manager**
The person responsible for specifying and managing the operation of features for all the voice and data equipment in your network.

**trunk**
A telecommunications channel between your switch and the local or long distance calling network. Trunks of the same kind connecting to the same end points are assigned to the same trunk group.

**trunk code**
A dial code of 1, 2, or 3 digits that you dial to access a trunk group to place an outside call.
