

Introduction to Triantan CCC Compliance and Risk Solutions

On a worldwide basis, Compliance and Risk solutions are being mandated by governments, institutions and business clients. Unfortunately, few organizations understand the importance of, or have even considered, the installation of a comprehensive C&R platform.

At TCCC, we say...

- Quit being reactive to changing industry business processes and cyber threats
- Be proud of your security posture and have verifiable documents ready to give to customers and partners
- Your IT platform is no longer a castle that you can protect from your home domain
- Strategically adapt your security plan based on Compliancy and Risk Solutions

Compliance and Security Experience

Currently only 10% of MSP's provide C&R services. TCCC has been offering C&R since 2019

Experts at Optimizing Your Entire Information Technology Platform

Local expertise delivered globally

At TCCC, we work with organizations to find workable solutions for all their IT needs

- Over 13 Certified Engineers
- Direct and immediate access to C-Level and Managers for remediation, escalations and updates
- Industry certifications in addition to all necessary manufacturer application and solution certifications
- 24x7x365 Monitoring and Support
- Tier II and III “live person” Technical / NOC Help Desk
- Customer CARE Team (non-technical request and Customer assistance)
- Supporting over 1.4M contracted maintenance/support endpoints or devices

About TCCC

TCCC supports customers ranging from a 1,000-user national account to a five (5) person office. “Small enough to care – large enough to get the job done”. Through experienced and trusted sales Account Executives and a world class Operations Team, TCCC assists its customers with single sites or multiple locations by deploying TCCC resources that deliver deep engineering expertise and specialized skills for designing, deploying, and maintaining Voice, Contact/Content Centers, Data, and Video. TCCC offers on premise, data center (COLO), and Hosted (Cloud) solutions.

Our Value Proposition

Our integrated team of sales professionals, engineers and project managers serve as advocates for our clients. We develop and integrate a full line of IT solutions that drive profitability, productivity and security for our clients. We’re global in our industry knowledge and nimble in ways that only local expertise can deliver.

Compliance and Risk Solutions

Compliance regulations exist to help companies improve their data security strategies by providing stringent guidelines and best practices. They are often industry-specific and based on the demands that data places on company operations.

Non-compliance with these regulations can result in hefty fines or worse, a security breach.

The Burden of Compliance

Rapidly increasing
influx of new
regulations

Existing rules and
requirements change
regularly

Producing evidence
or proof is
mandatory

Challenges for
monitoring
compliance in the
supply chain

Tackling new and
rapidly evolving

SUSPENSION

TCCC Compliance and Risk Service Offerings

Compliance risk is the risk of facing legal or regulatory sanctions, financial loss, damage to reputation or worse - a security breach courtesy of non-compliance. Building a comprehensive framework for regular assessment of compliance risk is mandated by an increasingly large number of all regulatory agencies.
